

JANUARY AND FEBRUARY 2026

HARRIS COUNTY WCID110 FOREST OAKS SWIM AND RACQUET CLUB

Save Your Pipes Don't Flush Wipes

Stop flushing wipes and other non-toilet paper items.
Even if the package says the wipes are flushable, they can cause serious damage to your pipes and our system.

Do not flush the following items:

- Wipes of any kind, including those that claim to be "flushable"
- Hair
- Dental floss
- Pills / Medication
- Paper towels
- Cigarette butts
- Cotton balls, pads, or swabs
- Tissues or napkins
- Food waste / dressing and sauces
- Fats, grease or oil
- Paint or hazardous waste
- Cat litter
- Bandages
- Fabric items
- Deceased fish or pets
- Diapers
- Pads, tampons, and applicators

Protect Our Pipes and System

Just because a product claims to be flushable doesn't mean it is. Continuous flushing of non-flushable items could wreck your lines and potentially damage our system. Clogged pipes can lead to backups and costly repairs. Those items eventually make their way into the system and create major clogs from waste balls of unflushable items.

Eye On Water Website

If you have not created your EyeOnWater account and setup leak alerts, now is the time. With potential cold weather and freezes, leak alerts may save you from higher water bills.

Something as simple as a leaky toilet may raise your water bill by 10-15% if not detected and repaired. Don't get caught offguard.

Have you created
your EyeOnWater
app yet?

You may be costing
yourself money so don't
wait until it's too late!!!

**REMINDER THAT FIREWORKS ARE NOT
ALLOWED AT FOREST OAKS FACILITIES,
INCLUDING PARKING LOTS AND PARK.**

BINGO at Forest Oaks

Wednesday, January 21
from 6 - 7:30 p.m.

HANDY TIPS TO

AVOID FROZEN PIPES

IT'S ABOUT PREPARATION AND PREVENTION. FROZEN PIPES CAN LEAVE YOU WITHOUT WATER IN THE WORST CONDITIONS. THEY ALSO COST A LOT TO REPAIR. BUT WITH A FEW SIMPLE STEPS, YOU CAN MITIGATE THE POSSIBILITY THAT YOU WILL HAVE BURST PIPES.

BEFORE COLD WEATHER SETS IN

Check your irrigation system and make sure it is turned off and drained.

Eliminate sources of cold air near water lines. Identify your home's freezing points and address them.

Know where and how to shut off your water from the main line in your home. Probably in your garage area.

Protect your pipes. Wrap them with insulation or towels. Go the extra step and add a protective layer on top of that like tarp or plastic and securely tie it on.

WHEN TEMPS STAY BELOW FREEZING

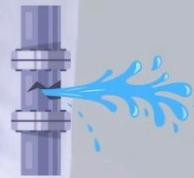

If pipes run through cabinets or vanities, open the doors and let warmer room temp flow in.

Keep water moving through the pipes by allowing a small trickle of water to run. Usually from the furthest faucet from your house main.

BUT IF YOUR PIPES BURST

1. Shut off water main in your home.
2. Call plumber
3. Call MOC
